INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP01/05319

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

Inventions of claims 1 to 41 are so linked as to form a single general inventive concept, since the inventions have common special technical features relating to the structure of an insulating film comprising two or more insulating layers of resin layers containing at least one layer comprising a polyimide resin which has a specific recurring unit, has a glass transition temperature of 150 ° to 360 °, and exhibits a rate of dissolution in a basic solution of 3 µm/min or more. On the other hand, inventions of claims 42 to 63 are so linked as to form a single general inventive concept, because the inventions have common special technical features relating to the structure of an insulating film formed from two or more resin layers wherein the ratio between etching rates for respective layers ranges 6:1 to 1:1. It is clear that the above two special technical features are different from each other.

Accordingly, a group of inventions of claims 1 to 41 and a group of inventions of claims 42 to 63 are not so linked as to form a single general inventive concept. It is clear that claims 1 to 63 do not comply with the requirement of unity of invention.

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest ☐ The additional search fees were accompanied by the applicant's protest.
☒ No protest accompanied the payment of additional search fees.
